MOMETASONE

Once daily
Low systemic absorption

CHEMICAL NAME 9,21-dichloro-11β,17-dihydroxy-16α-methylpregna-1,4-diene-3,20-dione 17-(2-furoate)
CLASS Potent topical / intranasal corticosteroid
TRADE NAMES Elocon · Nasonex (nasal) · Asmanex (inhaled) · Elomet

THERAPEUTIC USES / INDICATIONS

- Eczema/atopic dermatitis and psoriasis (topical, potent).
- Allergic rhinitis and nasal polyps (nasal spray).
- Asthma maintenance (inhaled).
- Seborrhoeic dermatitis of scalp (lotion).

ADMINISTRATION

- **Topical:** thin layer once daily.
- **Nasal spray:** prime first; head slightly forward; aim away from septum; do not sniff hard.
- **Inhaler:** rinse mouth after use.

DOSAGES

- **Skin (0.1%):** once daily, short courses (children ≥2 yr — limit duration and area).
- **Allergic rhinitis:** 2 sprays (50 mcg each) into each nostril once daily (200 mcg); children 3–11 yr 1 spray each nostril.
- **Nasal polyps:** 2 sprays each nostril twice daily.

PHARMACOKINETICS

- Very low systemic bioavailability (nasal <0.1%; skin limited).
- Metabolised in liver (CYP3A4).

PHARMACODYNAMICS

- Potent **glucocorticoid** → ↓ inflammatory mediators, oedema, itching in skin and nasal mucosa.

SIDE & ADVERSE EFFECTS

SIDE EFFECTS (COMMON)

- Skin: burning, itching, atrophy (prolonged).
- Nasal: epistaxis, dryness, headache, pharyngitis.
- Inhaled: oral thrush, hoarseness.

ADVERSE EFFECTS (SERIOUS)

- Skin atrophy, striae; adrenal suppression (extensive use in children).
- Nasal septal perforation (rare).
- Glaucoma, cataract (prolonged use).

CONTRAINDICATIONS & CAUTIONS

- Untreated skin infections; rosacea, perioral dermatitis, acne (topical).
- Untreated nasal infection; recent nasal surgery/trauma (nasal).

KEY INTERACTIONS

- **Ritonavir, ketoconazole:** ↑ systemic exposure (inhaled).

NURSING MANAGEMENT

- Teach technique (FTU, nasal spray).
- Monitor growth in children on long-term nasal/inhaled steroids.
- Assess skin and nasal symptoms.

PATIENT EDUCATION

- Nasal spray works over days — use daily during allergy season.
- Report nosebleeds or persistent nasal soreness.
- Apply cream thinly once daily.

KEY POINTS

- Potent once-daily steroid (skin, nose, lungs).
- Low systemic absorption.
- Nasal: 2 sprays each nostril daily.
- Atrophy with prolonged skin use.
